

Subject: Request for Referral - Birlasoft Internship Opportunity

Dear Recipient,

I hope this message finds you well. I recently came across the opportunity for the Apprentice (Intern) position at Birlasoft ([Job Description](#)) and found it to be a perfect match for my skills and aspirations.

As a recent Computer Engineering graduate with a strong foundation in programming languages (Python, Java, C++), frameworks (Django, Angular, React JS), and a keen interest in cloud services and IT infrastructure, I am eager to contribute to a dynamic organization like Birlasoft. My academic projects, such as **ShareSphere**, a blockchain-based document-sharing platform, and **Quizly**, an online examination application and many more projects, reflect my ability to handle diverse and challenging tasks.

I would be incredibly grateful if you could review my profile and consider recommending me for this role, should you find my skills and experience aligned. If affirmative, I kindly request you to provide your name along with your company-provided email ID, as these details are required for the Superset application process.

Thank you for your time and support. I look forward to the possibility of connecting and learning from you.

Best regards,

Rohit Bhavsar
